TAMPA, FL, May, 2019 - Next Generation AC LED Drivers Combat Industry Issues

Hatch Lighting has released the new RL-Series LED Driver family for use with AC LED lamps. The RL-Series is the next generation of the RS-Series LED driver family which currently powers millions of lamps worldwide. The RL-Series was developed in response to customer requests for a product that would be compatible with more lamp types and allow for the wiring of a larger number of drivers on a single electrical circuit.

Going forward, Hatch will only be sampling the RL-Series drivers to new OEM customers and will be requesting that all existing OEM customers switch all standing RS-LED orders to compatible RL-LED units by November 1st, 2019. Hatch will switch all standing RS-LED orders to compatible RL-LED units by November 1st, 2019.

Hatch will continue to support the RS-LED driver series for warranty and replacement business.

The RL-Series LED drivers are available in 15W, 30W and 60W models in both side lead and bottom feed configurations. They feature excellent full range dimming and come with a 5 year warranty.
